

ENVIRONMENTAL AND SAFETY MANAGEMENT POLICY

Ansaldo Nucleare S.p.A. assumes the environmental defence and the personnel's health and safety protection as fundamental requirements to be met during planning and performance of its activities.

In order to assure that, the Management of Ansaldo Nucleare S.p.A. is engaged to:

- **Comply with all the applicable laws, regulations and standards related to environmental protection and to health and safety of working conditions**
- **In addition to the law requirements, comply with the voluntary requirements and regulations subscribed concerning environmental protection and safety, thus obtaining the ISO 14001 certificate and realizing the full implementation of the Safety Management System according to OHSAS 18001 concerning home and site activities within the end of the year 2006**
- **Prevent any kind of pollution**
- **Prevent any risk for the workers**
- **Assess the compliance of on-site contractors and sub-contractors with the same environmental, quality and safety standards adopted by Ansaldo Nucleare**
- **Constantly improve the company's performance environmental care as well as the personnel's safety and health working conditions, with particular reference to the activities detailed in the following.**

1. development of research implementations in the field of the protection against the ionizing radiations, and assumption of the best design technologies and choices aiming to the protection of population and workers during the phases of plant erection, construction, operation management and decommissioning

2. *Development of resolutions aimed to reduce the noise generation and the release of exhaust gas in the atmosphere coming from the designed plants*
3. *Promotion of design realization concerning the company's personnel accessible motion capability*
4. *Development of waste differential management concerning the residuals coming from the home activities*
5. *During the lay-out definition and indication of the on site equipment, implementation of the best methods for assuring prevention of accidents having impact on the personnel and on the external environment, and for reducing their impacts in the case of their occurrence.*

Besides this, Ansaldo Nucleare is engaged to:

- *make available one copy of this policy document to all persons who are working for the company or on its behalf, and assess its full comprehension and implementation by all categories*
- *send one copy of this policy document to all external parties who should ask for it*
